Aristos Georgiou

I am a 2nd year undergraduate student majoring in **Computer Science** at the **University of Cyprus**. My strength lies in analysing algorithms and their complexity in order to solve problems through an object oriented programming approach. I'm interested in getting proficient with machine learning after my preoccupation with frontend development along with deploying my own projects.

Email: ageorg08@cs.ucy.ac.cy

Education

- Technical School of Larnaca – Top student of 2015 Computer Dept class.

- Top student in CS 133 Object oriented design in **Java**(piazza – Spring 2018).

- Top student in CS 231 Data structures and Algorithms(piazza – Fall 2018).

Other notable classes taken at University of Cyprus:

- CS 211 Theory of Computation.

- CS 232 Programming Techniques and tools / **C** programming.

- CS 236 Algorithms and Complexity.

Languages

- Expert in Greek(Mother tongue).
- English B2 level(Cambridge FCE examination).

Experience & Interests

- Cypriot National Guard – Telecommunications Squad.
- Taekwondo 2nd dan black belt.
- Solving problems in coding sites with online test cases.
- Getting education from experts at youtube and MIT OpenCourseWare.
